

I'm writing to express my displeasure in just finding out about another broken promise made to the taxpayers of Connecticut.

Along with recent information regarding the broken promise made to ESPN and their tax situation, I now hear about Bill #1132 regarding our tax money being diverted to support the new Ball facility in downtown being added to the growing list of broken promises.

OUTRAGEOUS to say the least. I am among the vast # of people who don't attend baseball games and don't plan to attend functions held at this venue especially since it's in downtown Hartford. We already have a fantastic facility in East Hartford. Our tax dollars need to be spent on what they were collected for. ROAD and BRIDGE repair comes to mind.

That a bill like this was even proposed should actually not surprise me. I am disgusted in the way this state is being run by the current administration and how it speaks to the reason so many people I speak to are planning on leaving the state.

I am requesting that this bill be thrown out and the state start living up to the promises made to it's taxpayers. if only for the reason that someone had the gall to propose it , it should be dismissed.

Thank you for your time.
